Skin transformation by Clarisonic.

Who knew something so powerful could be so gentle?

Why do thousands of dermatologists recommend Clarisonic, even for sensitive skin? Unlike harsh cleansing methods that can cause skin to become red, dry or uneven, Clarisonic works with skin's natural elasticity, so it's gentle. Our sonic cleansing brush lifts away impurities that get trapped in pores, gently cleansing 6X better than your hands alone. So skin is smoother, softer and more radiant. Even the most sensitive skin can be transformed with Clarisonic.

See the sonic difference—Clarisonic gently cleanses 6X better than your hands alone.*

Results of a clinical study cleansing fluorescent makeup from the forehead.

clarisonic®
We promise to transform your skin.

This is Emily and her actual non-retouched skin after using Clarisonic.
