

6.11.2012

Cross Cultural Psychology

this is the course schedule for cross cultural psychology:

16/10; 23/10, 6/11, 13/11, 20/11, 27/11, 4/12
(final exam); time 9-11

Referring to the **workshop observing children at school**, this is the course schedule:

7/11, 14/11, 21/11, 28/11, 5/12 (final exam);
time 11-14.

This course for italian students lasts 15 hours, but for erasmus student only 10 hours; so you can decide if attend all the lessons or not

Principles of Multiple Intelligence Theory

1. Intelligence is not singular: intelligences are multiple.
2. Every person is a unique blend of dynamic intelligences.

Principles of Multiple Intelligence Theory

3. Intelligences vary in development, both within and among individuals.
4. All intelligences are dynamic.
5. Multiple intelligences can be identified and described.

Principles of Multiple Intelligence Theory

5. Every person deserves opportunities to recognize and develop the multiplicity of intelligences.
6. The use of one of the intelligences can be used to enhance another intelligence

Kind of intelligences in real life

1-Linguistic Intelligence

would be required for skills such as reading of trade literature, adaptive conversational skills, active and responsive listening, and writing report and memos

Word Smart
(Linguistic)

2-Logical-Mathematical Intelligence

Would be necessary not only in the form of technical specialization or industries expertise, but as generalist skills to handle organizations and sequencing of projects, the application of logic and objectivity to decision-making

Number Smart
(Logical/Mathematical)

3-Naturalistic Intelligence

organizations are forced to take a more environmentally friendly approach to production, as more people demand environmentally pure or friendly products.

Nature Smart
(Naturalist)

4-Musical Intelligence

doesn't require that every people sing for their colleague, but they apply skill in attending to tone, volume, sequence and so on

Music Smart
(Musical)

5- Visual Intelligence

involves the use of pattern, colour, shading, movement, depth and so on not only in product or service development but in a variety of concrete applications to create and maintain a productive workplace

Picture Smart
(Spatial/Visual)

6-Kinesthetic Intelligence

does not mean just physical strenght or the ability to do the tango.

acquisition of computer keyboard skills,
demonstration of a complicated
mechanical operation, or handling
technical or scientific equipment.

7-Inter-Personal Intelligence

according to daniel goleman may be the linchpin which holds together the qualities of a good leaders (for example): the ability to understand the needs of others and of self and to respond appropriately to these

8-Intra-Personal Intelligence

is a fundamental requirement for mental stability and resistance to depression or despair when things go wrong

Self Smart
(Intrapersonal)

9-Existential Intelligence

It allows people to align their aims and objectives with those of team mates or with the organization to which they belong. It allows the development of vision, the evaluation of processes using criteria which go beyond the immediate bottom line
